UCLA

Homework 0
Due 5pm, Wednesday, April 5, 2017

Submit `my_hello.cpp`. You may not use `stdafx.h`.

Problem 1: (My hello world)

Write a program that outputs exactly:

```
Hello world!
What is my name?
My name is X.
A wise man said "Always code as if the
guy who ends up maintaining your code will be
a violent psychopath who knows where you live.".
```

Substitute X with your name. Name your file `my_hello.cpp`.

Hint. To output quotation marks, use an *escape sequence*. Writing
```
... said "Always code ...
```
will fail. Write
```
... said \"Always code ...
```
